PROFILE

I am an Experienced Web Backend Developer with 5+ years of experience in designing and building secure, scalable backend systems using PHP, Laravel, and other modern technologies. Proven track record of delivering CMS platforms, fleet systems, and high-performance websites. Skilled in collaborating with UI teams and ensuring fast, secure backend delivery.

EDUCATION

NCBA&E

BS Computer Science

Islamabad, Pakistan

2014 - 2018

WORK EXPERIENCE

OBS Technologia

Sr Back End Developer

On-site

01/2025 – Present

- Developed and maintained scalable backend modules and RESTful APIs for mobile and web applications.
- Led backend development for a franchise-based mobile app for selling ice, custards, and desserts, including Coupons and Rewards features.
- Built secure, automated backend workflows for a website that scans and submits opt out forms to a public search platform.
- Utilized ScrapingBee API and Laravel Dom crawler scripts to extract and submit data while maintaining user privacy and compliance.
- Integrated a Shopify-based chimney product catalog with backend systems using GraphQL APIs, enabling real-time sync of product listings, catalogs, and company users for home-roof installations.
- Ensured performance, security, and reliability across all backend systems.
- Projects: ritasice.com, copperfield.com, privacybee.com

En Route Technologies

Back End Developer

On-site

12/2021 – 12/2024

- Created powerful CMS platforms to serve as client-facing systems.
- Collaborated with UI/UX designers to enhance application interface.
- Developed backend systems for: vacancies.ae, Fleet Management System, Leasing Management System.
- Implemented encryption, firewalls, and secure data policies.

The Educational Network

PHP Laravel Developer

On-site

2019 – 2021

- Developed backend systems for major educational websites.
- Maintained and optimized large Laravel applications.
- Projects: codemena.com, mazadi.com, oasis.sis.edu.sa, oecube.com

DevBeta

Web Developer

On-site

2018 – 2019

- Built websites using HTML, CSS, JavaScript, jQuery, and PHP, Wordpress.
- Key project: devsbeta.com

PROJECTS

School Management System — (Saud International School, KSA)

- Built in Laravel, Livewire with RFID integration and full panel system for Admins, Teachers, Parents.
- Improved school operational efficiency by 50%.
- Technologies: Laravel, Livewire, Bootstrap, JS, MySQL

Job Portal — vacancies.ae (UAE)

- Developed backend features for job postings, search, and CV management.

Fleet & Leasing Management Systems

- Built secure modules for vehicle inventory, networks, and reporting.

Other Projects:

- oasis.sis.edu.sa, oecube.com, codemena.com, mazadi.com, devsbeta.com, careatheart.co.uk,

SKILLS

Technical:

PHP, Laravel, Livewire, Lumen, CakePHP, Yii,

MySQL, HTML, CSS, Bootstrap, JavaScript, jQuery,

Rest APIs, GraphQL APIs, CMS Development, Security Best Practices, Filament,

Git, Bitbucket, Agile Collaboration, AWS, Firebase.

Languages: English (A1)

Interests: Development, Gaming, AI

KEY ACHIEVEMENTS

- **Delivered Complex, Scalable Backend Systems:** Successfully built and maintained high-performance backend infrastructures using PHP, Laravel, and REST APIs for job portals, fleet and leasing systems, and educational platforms across UAE and KSA markets.
- **Led Data-Sensitive Automation with Web Scraping:** Designed a secure backend system using ScrapingBee and DOM crawler to scan, extract, and auto-submit public forms—protecting user data and improving efficiency.
- **Shopify Integration for Real-Time Product Sync:** Implemented GraphQL-based integration with Shopify for a chimney product platform, automating product catalog sync and enabling seamless front-end operations for a home improvement business.
- **Mobile App Development for Retail Operations:** Contributed to the backend of a mobile app for franchise-based ice and custard sales, handling order workflows, clover product listings, and coupons, rewards via API-driven architecture.
